## I. DISCUSSION

Wamego Telecommunications Company, Inc. (the Company), an ETC designated by [state commission/tribal entity/FCC], hereby submits this five year service quality improvement plan progress report (*Progress Report*) as required by 47 CFR § 54.313(a)(1). The Company is an incumbent carrier with a service area in the state of Kansas, with 4,625 access lines as of 12/31/2014 in three exchanges. The Company is a rate-of-return (RoR) regulated carrier.

The *Progress Report* reflected herein represents the Company's ongoing efforts to expand high quality, reasonably-priced broadband services throughout its service area. The Company generated and filed in 2014 a five-year plan in compliance with the Commission's rules, although the out years in the plan (years 3-5) are highly speculative in nature and thus will likely change, sometimes substantially, in future progress updates filed with the Commission. Reasons for the speculative nature of years 3-5 of the Plan include (1) the unknown nature of universal service support in those years, in light of the Commission's USF/ICC Transformation Order, (2) the difficulty in forecasting customer counts, demand, and other factors directly affecting network demand, and (3) the rapid pace of technological innovations in the communications industry makes it difficult to plan more than one or two years in advance with any degree of accuracy.

The *Progress Report* presented herein by necessity includes expenditures not directly tied to "improvements or upgrades" of the Company's network, such as amounts for the maintenance and upkeep of existing telecommunications plant. In order for the Commission to accurately consider the capital and operating expenditures as related to and supported by the federal universal service programs, these types of costs are critical for such an understanding.

## II. Five Year Plan Update

The Company has updated the five year service quality improvement plan it filed in 2014 as described below. The main reason for any updates to its five year service quality improvement plan relates to the Company's revisions to capital and operating expense budgets due to a number of factors, including, but not limited to, market changes, regulatory uncertainty, and technological advancements.

Description	2016	2017	2018	2019
CapEx - Wamego	\$1,178,446	\$603,867	\$981,284	\$981,284
CapEx - St. George	960,530	136,930	222,511	222,511
CapEx - Paxico	91,024	59,203	96,204	96,204
OpEx - All Exchanges	240,000	280,000	320,000	360,000

The total amount of CapEx has not changed but amounts assigned to particular exchanges have been adjusted to reflect the most current capital plans. OpEx has been increased to recognize operating and inflationary adjustments.

### III. Progress Report

#### A. Maps

Section 54.313(a)(1) requires that all recipients of high cost support are to provide maps depicting the progress made during the current reporting period. The Company is providing a map showing progress in regards to its five year service quality plan through June 30, 2015, and is provided at the wire center or census block level, as applicable.

#### B. Universal Service Support Received

Section 54.313(a)(1) requires that all recipients of high-cost support provide an explanation of how much universal service support was received during the reporting period. For this year's Progress Report, the amount of universal service support received will be for the 6 months ended June 30, 2015. The Company received the following universal service support amounts during the period January 1, 2015 through June 30, 2015:

Description	Amount Rec'd Jan - Jun 2015
High Cost Loop Support	\$720,609
Safety Valve Support	0
Safety Net Additive Support	0
Interstate Common Line Support	868,104
CAF-ICC Support	107,658
<b>Total</b>	<b>\$1,696,371</b>

Of the total amount of support received shown above, the Company estimates that approximately 40% was used for capital expenditures and 60% was used for operating expenditures.

#### C. How Universal Service Support Was Used

Section 54.313(a)(1) also requires all recipients of high-cost support to provide an explanation of how the universal service support received was used to improve service quality, coverage, or capacity. The universal service support received by the Company is either based on (1) actual overall revenue requirements, as determined by associated FCC rules, or (2) the replacement of certain interstate and intrastate access revenues. This support is added to the Company's general funds and the expenditure of such support is not separately tracked, nor is it practical to do so.

Overall, any support expended pursuant to the investment and operating expense budgets presented in the Company's five year service quality improvement plan will be used to increase coverage and capacity, via additional investment in voice and broadband-capable infrastructure, and improve service quality, via expenditures for continued operations and maintenance. By the very nature of the FCC rules that give rise to the universal service support received, the Company clearly expends such funding to support regulated operations and thus serves to improve broadband and voice coverage, capacity and service quality. Therefore, due to the reimbursement nature of the HCLS and ICLS mechanisms, all support received was already expended to increase coverage, capacity and service quality

improvement through qualifying capital investments and the qualifying operating expenses that support them.

As for projects completed during the progress report period, the Company deployed fiber-to-the-premises to approximately 100 customers and added fiber backbone in the Wamego exchange to provide higher broadband speeds to all customers. Currently, 10/1 Mbps broadband service is available to 91% of the Company's service area.

#### D. Network Improvement Targets

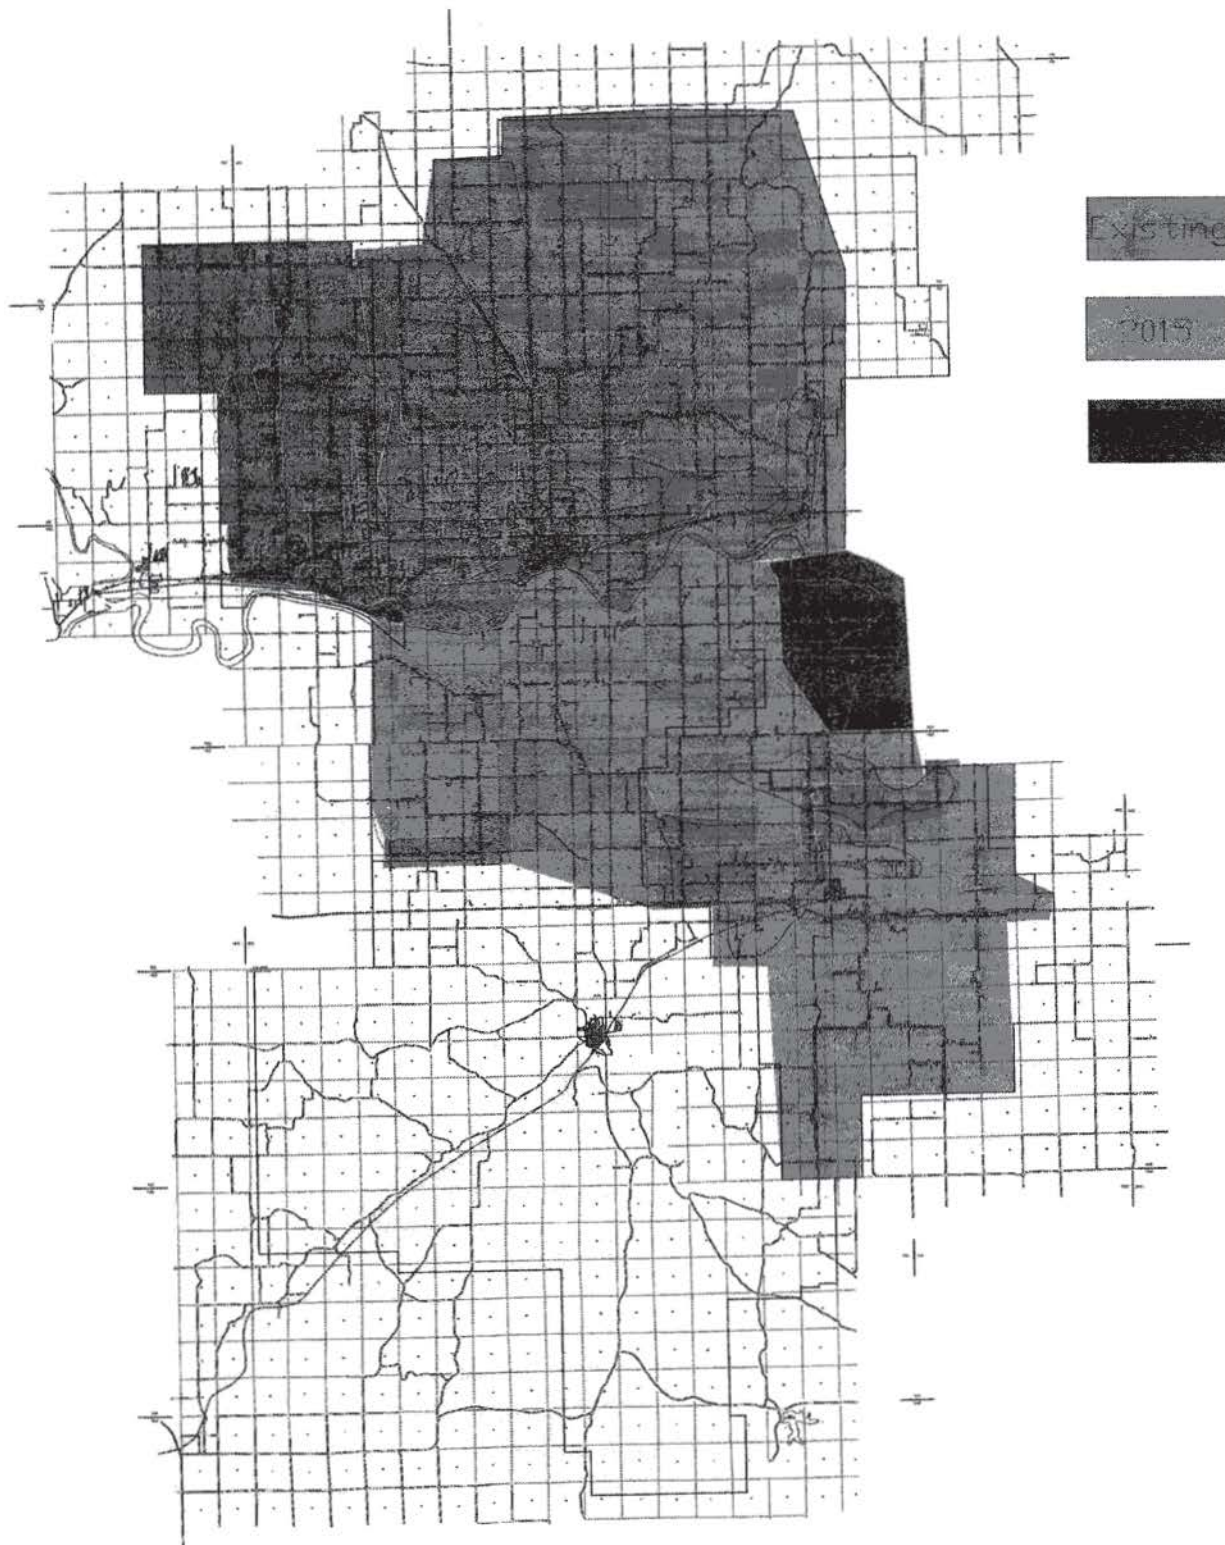

Section 54.313(a)(1) requires all recipients of high cost support to provide an explanation of any network improvement targets that have not been fulfilled in the prior calendar year. Since the Company filed its initial five year service quality improvement plan in 2014, there is no prior calendar year upon which to report at this time.

### IV. Considerations

The investment and service quality improvement plan and progress report discussed above were generated, in part, to meet or exceed the broadband public interest obligations adopted by the Commission:

- *Speed* - at least 10 mbps upstream and 1 mbps downstream in regards to requests for service beginning in 2015. This reflects the Commission's recent decision to increase the standard broadband speed from 4 mbps /1 mbps.
- *Latency* - 100mS or less, sufficient for real-time applications
- *Capacity* - The Company currently provides [insert monthly usage allowance] to its broadband service customers.
- As an RoR-regulated carrier, the Company is required pursuant to 47 CFR § 54.313(f)(1)(i) to provide broadband service at 10 meg/1 meg upon reasonable request and within a reasonable timeframe. As a result, the Plan and Progress Report reflected herein takes into account this requirement by meeting all such requests for broadband service within the overall service guidelines adopted by the Kansas Corporation Commission.
- The Company will provide high speed internet and telephone service to all areas within its franchised area.
